COLOCATION

Datrix

THE FOUNDATION FOR YOUR DIGITAL DEPLOYMENTS

Datrix Colocation delivers high-performance, carrier-neutral infrastructure in strategically located Data Centers across Latin America. With resilient power, advanced cooling and enterprise-grade security, it provides the control and reliability required to deploy mission-critical workload. Ready to launch and scale across Latin America.

BUILT TO SCALE WITH YOU

Datrix Colocation puts critical IT infrastructure inside Latin America's most connected Data Centers. From racks and cages to custom suites, customers gain the power, cooling, security and operational support needed to scale with confidence.

Backed by globally recognized certifications and energy-efficient operations, our facilities deliver the resilience, compliance and sustainability required for business-critical deployments.

100+
Network Carriers & Service Providers

9,000+
Cross-Connects

Years Operating in Latin America

WHY DATRIX COLOCATION

COST SAVINGS & EFFICIENCY
Reduce capital investment by outsourcing equipment hosting while optimizing energy efficiency and operating costs.

SCALABILITY & FLEXIBILITY
Expand your infrastructure footprint as your business grows, without disrupting operations.

RESILIENT INFRASTRUCTURE
Redundant power, advanced cooling and high-availability systems support mission-critical operations.

CARRIER-NEUTRAL ACCESS
Choose from 100+ network providers and connect directly to clouds, carriers and partners across our interconnected facilities.

LATIN AMERICA'S CONNECTED ECOSYSTEM
Deploy close to customers, cloud on-ramps and service providers in the region's key digital hubs.

SECURITY & COMPLIANCE
Multi-layered physical security and recognized certifications protect business-critical infrastructure.

COLOCATION COMPONENTS

- Racks, cages and custom footprint configurations
- A+B power feeds and environmental controls
- Physical security infrastructure, including biometric access, CCTV and controlled entry
- Remote Hands and Smart Hands support
- Carrier-neutral access and cross-connects
- Proximity to cloud platforms, partners and digital ecosystems

IDEAL FOR

CLOUD & SAAS PROVIDERS
Seeking low-latency access and proximity to cloud and digital ecosystems.

ENTERPRISES
Building hybrid and multi-cloud strategies across Latin America.

TELCOS, ISPS & NSPS
Expanding regional reach, interconnection and peering capacity.

AI, ML & HPC ENVIRONMENTS
Requiring scalable infrastructure, high-density power and low-latency connectivity.

READY TO DEPLOY?

Let's build your Colocation roadmap across Latin America.
