COMPUTE

Datrix

CLOUD-READY COMPUTE, MINUS THE OVERHEAD

Bare metal and private cloud platforms engineered for performance, control, and scale—delivered across Latin America.

Datrix Compute gives you cloud-like agility with the control of dedicated and multi-tenant infrastructure.

Whether you're running AI inference, managing hybrid environments, or deploying business-critical apps, Datrix Compute delivers high-performance compute platforms optimized for speed, scale, and sovereignty.

11
Data Centers, including those under construction

3
AI-ready facilities in Rio, Lima and Santiago

5
Cable systems: PAC, MAC, SAC, SAC-2 and CC

KEY BENEFITS

PRIVATE CLOUD FLEXIBILITY
Virtualized environments tailored to your needs.

BARE METAL PERFORMANCE
High-density servers for maximum throughput.

HYBRID CLOUD READY
Seamless integration with public clouds via Datrix Connect.

SPEED, SCALE & SOVEREIGNTY
High-performance compute platforms for business-critical apps across Latin America.

PRODUCT COMPONENTS

- Dedicated bare metal servers
- Private cloud virtualization environments
- Hypervisor layer (e.g. VirTRX, VMware, KVM)
- Hybrid cloud connectors

IDEAL FOR

SAAS COMPANIES
Needing reliable compute close to users.

ENTERPRISES
Needing control over infrastructure and where their data resides.

AI/ML & RESEARCH TEAMS
AI/ML providers and research teams running training and inference workloads.

READY TO DEPLOY?

Build your custom compute environment with your Datrix representative.
