CONNECTIVITY

Datrix

YOUR GATEWAY TO LATIN AMERICA'S DIGITAL ECONOMY

Datrix Connectivity is the interconnection layer of Datrix Platform, delivering fast, secure, carrier-neutral connectivity across Latin America's key cloud-enabled hubs. Connect and scale across more than six countries through 11 data centers, with low-latency performance and a robust ecosystem designed to simplify hybrid deployments and accelerate time-to-market.

POWERING LOW-LATENCY CONNECTIONS

Powering low-latency connections to public clouds, carriers, and key partners across Latin America.

100+
Carriers & Service Providers

4,900+
Cross-Connects

11+
Data Centers

6
Countries, and Growing

25+
Years of Operational Excellence

KEY BENEFITS

ULTRA-LOW LATENCY
Optimized for edge and core workloads that require speed and reliability.

FLEXIBLE DEPLOYMENT
Deploy interconnection services as your needs evolve — from single cross-connects to multi-site integration.

SECURITY AND CONTROL
Keep your traffic off the public internet with private links and advanced routing (coming Q4 2025).

DENSE INTERCONNECTION FABRIC
Access 100+ carriers and service providers, and 4900+ cross-connects available across Latin America.

DIRECT CLOUD ACCESS
Private, high-performance links to AWS, Google Cloud, Oracle, and Microsoft.

PRODUCT COMPONENTS

- Secure, low-latency cross-connects to networks, clouds, and partners.
- Direct on-ramps to leading public cloud providers.
- High-throughput Internet Exchange peering options in core markets.
- Scalable internet access and routing services.

IDEAL FOR

HYPERSCALERS & TELCOS
Seeking neutral, scalable colocation.

ENTERPRISES
Modernizing infrastructure without CAPEX.

EDGE DEPLOYMENTS
Requiring geographic reach and uptime.
